**IADC ART Reliability & Guidelines Subcommittee Meeting**  
**IADC Advanced Rig Technology Committee**  
**8:30 am, Wednesday, 11 November 2009**  
**IADC Headquarters**

## Attendance:

Joe Berry, Forum Oilfield Technologies  
Mike Killalea, IADC  
Andy Shelton, National Oilwell Varco  
Tom Yost, National Oilwell Varco  
Robert Urbanowski, Precision Drilling

## Minutes:

1. Mike Killalea welcomed the group.
2. Mike noted there is no meeting agenda. Logan Puckett had resigned as Subcommittee Chair and this subcommittee lacks a Subcommittee Chair. It was agreed for now Robert Urbanowski would continue as an interim 'Subcommittee Chair in fact'.
3. The IADC's *Antitrust Guidelines* were discussed. Copies were distributed to those who were unfamiliar with them.
4. The top drive reliability survey was discussed. The survey is up and running. Mike Killalea had emailed out a request for participation to various companies approximately one week ago. Mike Killalea reported he had a positive response from one large offshore drilling contractor at the IADC Annual Meeting held previously this same week.
5. The addition of definitions and photos to the "*IADC Technology Value Guide*" matrix was discussed. Andy Shelton distributed the current draft, but indicated there were still missing definitions, missing photos, missing training sources and some possible additional advanced technologies to add to the matrix. It was decided the subcommittee would focus on getting the current matrix completed with the wording "draft" removed at "Rev 1". Mike Killalea would send this out to the full IADC ART Committee for (a) review/comments and (b) soliciting missing definitions, photos and training sources.
6. The next work items were discussed:
  - A) PLC type Pipe Handling Systems Reliability Survey, and
  - B) Pressure Control Systems (MUX / BOPs) Reliability Survey.
7. It was decided the next meeting would be 09-Dec-2009 at 8:30 AM CST at the IADC office in Houston, Texas.
8. The meeting was adjourned.
