IADC Future Technology Subcommittee Meeting
IADC Advanced Rig Technology Committee
8:30 am, 5 February 2009
IADC Headquarters

ATTENDEES:

In Person: Frank Springett
Hugo Valdez
Chris Goetz
David Reid (part time)

Online: Karl Faller

Minutes

Condition Based Monitoring – We discussed the DC article for Condition Based Monitoring. Karl is going to set up an outline and send it to Mike, Frank, Chris and Hugo for review.

Siemens Automated Plant – Frank Springett has contacted a Siemens representative who is willing to present a paper at the ART conference to discuss Siemens' completely autonomous manufacturing plant.

Survey

1 – Introductory Paragraph should be written to explain to the survey taker the purpose of the survey and how we would like them to participate.

2 – Change the Rating / Ranking to pick the single most important technological feature for each of the categories of interest.

3 – Future Wild Ideas – Ask the survey taker where he/she may see the industry in 20 years – anything's possible.

4 – Completions – We need more information on the completions section of the survey. Frank S. and David R. will ask some operators about this.

5 – Survey Making – From the Survey spread sheet, we are to make a web survey to trial. Before the next meeting, everyone should take the survey and make a list of comments. Survey needs to be ready by SPE/IADC Conference.

INTERNATIONAL ASSOCIATION OF DRILLING CONTRACTORS

6 – Survey non-categorization – Survey should allow the taker to answer only the questions that pertain to their expertise instead multiple surveys.

7 – HSE Sheet needs to go to an HSE guy. Chris is to ask Urbanowski to help in this area.

8 – Next meeting to be March 5th at 8:30am.
