He previously served for 3 years as Region Manager for Well Services in Asia Pacific and altogether has 19 years experience in the oilfield service business. ■

PRODUCTS

Shale-inhibitive fluid. M-I LLC recently published a 6-page brochure on its SILDRIL silicate-base drilling-fluid system. SILDRIL was designed to provide optimum shale inhibition and environmental compliance.

Shale inhibitive fluid

The 4-color brochure examines a system that the company says has consistently recorded high ROPs in the most reactive shale environments. The result in an average cost per foot significantly lower than traditional inhibitive water-base systems, M-I says. PO Box 42842; Houston, Texas 77242-2842 USA; 1/713 739 0222; fax, 1/713 308 9695.

Composite rigging sheave. Wireline Technologies recently introduced a "sealed bearing" composite rigging sheave for the oil-service industry. The new sealed sheaves, the company says, will include the same features as older WTI sheaves, the only difference being the

Rigging sheave

bearing system and the color of the cover. The bearing system features an aluminum bearing hub completely sealing the bearings from outside elements or intrusion. 580 North 700 West; North Salt Lake, Utah 84054 USA; 1/800 743 2831; fax, 1/801 294 9877.

Automated drilling systems. Wildcat Services offers multi-parameter automated drilling systems to control pump pressure (within ± 25 psi) and weight on bit (within ± 250 lb), the company says. The system can reportedly sustain potential instantaneous drilling rates up to 500 ft/hour, depending on the limits of the braking system, air supply, and other rig features. Wildcat also offers an ROP limiter that allows the pace of feed off to be preset. 1/281 463 6322 or toll free at 1 877 463 6322; wildcatservices@msn.com; www.wildcatservices.com.

Well completion/servicing handbook. Now available from IADC Publications, "Well Completion and Servicing", published by Éditions Technip, provides technical information on drilling in the pay zone to production startup, as well as the main methods for artificial lift and well servicing. IADC Publications, 1/281 578 7171; fax, 1/281 578 0589; publications@iadc.org. ■
