## IADC applauds Senators' leadership in opposing federal drilling moratorium

*Editors & reporters: To review IADC's recent news releases on the drilling moratorium and other resources, please go to [www.iadc.org/offshore GOM reform](http://www.iadc.org/offshore_GOM_reform).*

Houston, 19 July – The International Association of Drilling Contractors (IADC) applauds the leadership of three United States Senators, David Vitter (Louisiana), John Cornyn (Texas), and Roger Wicker (Mississippi), who are opposing the federal moratorium on offshore permitting and drilling activities announced on July 12 by Secretary of the Interior Ken Salazar. Last week the three Gulf Coast senators sponsored legislation (S. 3588) to lift the offshore drilling and permitting moratorium for companies that have complied with the new safety and inspection requirements issued by the Department of the Interior.

“The men and women whose livelihoods depend on the offshore oil and gas exploration and production industry in the Gulf of Mexico deeply appreciate the efforts of our legislators to lift the drilling moratorium,” said IADC President Dr. Lee Hunt. “Industry representatives have communicated to the Interior Department and Congress our industry’s strong commitment to rigorous requirements for well design, enhanced training, and adoption of safety case requirements for Mobile Offshore Drilling Units (MODUs). We are dismayed by the continued blanket suspension of deepwater drilling in the U.S. Gulf of Mexico. Lifting the moratorium is critical to tens of thousands of jobs in the deepwater industry and to the oil and gas service sector in the Gulf Coast region and throughout the country.”

IADC is dedicated to enhancing the interests of oil-and-gas and geothermal drilling contractors worldwide. Founded in 1940, IADC’s mission is to improve industry health, safety and environmental practices; advance drilling and completion technology; and champion responsible standards, practices, legislation and regulations that provide for safe, efficient and environmentally sound drilling operations worldwide. IADC holds Accredited Observer status at the International Maritime Organization and the International Seabed Authority, specialized agencies of the United Nations. The Association is a leader in developing standards for industry training, notably its Well Control Accreditation Program (WellCAP)<sup>®</sup> and rig-floor orientation program, RIG PASS<sup>®</sup>. IADC is headquartered in Houston and has offices in Washington D.C., the Netherlands, Thailand, and the United Arab Emirates, as well as chapters in the UK, Venezuela, Brazil, Australasia, South Central Asia, Southeast Asia, the Middle East and across the United States. For more information, visit the IADC website at [www.iadc.org](http://www.iadc.org).
