

IADC Service Contractor Orientation

UBO RIG PASS[®] **Accredited Programs**

April 2006

INTERNATIONAL ASSOCIATION OF DRILLING CONTRACTORS

Form UBO-15
Revision 060420

INTERNATIONAL ASSOCIATION OF DRILLING CONTRACTORS

UBO RIG PASS

The International Association of Drilling Contractors is pleased to present the following list of schools that have attained, or are in the process of attaining approval under the IADC ***UBO RIG PASS*** Service Contractor Orientation Accreditation Program.

IADC accredits active service contractor orientation programs designed for new employees or employees new to a specific operation or area. The function of the ***UBO RIG PASS*** Accreditation for Service Contractor Orientation programs is to provide a central review mechanism and information clearinghouse through which it can be ascertained that an orientation program given by a service contractor, commercial interest, or educational facility subscribes to core elements of a field employee orientation as identified by the industry. The purpose of the ***UBO RIG PASS*** accreditation system is to identify core elements for drilling and service contractor field employee orientation and to provide a means of recognizing continuing adherence to the core elements for service contractor field employee orientation programs through existing and innovative training techniques.

IADC

Since 1940, IADC has exclusively represented the worldwide drilling industry. IADC leads the industry in promoting well control education and training and molding productive efforts with world governments to encourage industry self-regulation.
