10:30  Panel Process Safety
Moderator: Alain Moonen, Manager Wells Safety, Shell Integrated Gas
As the drilling industry continues to work toward its goal of zero incidents, process safety has become an increasingly important consideration within companies’ overall HSE strategies. Alongside the more traditional programs and policies already in place to safeguard personal safety, organizations are taking steps to formalize frameworks to prevent major incidents that could threaten our license to operate. This session will provide different perspectives on the programs under way to ensure well integrity, to create a strong culture that supports process safety, and ultimately to keep our people and our equipment safe.

Moderator: John Karish, Director – Safety, Health & Environment, Ensco plc

The challenge for leaders today is to create an organizational culture that promotes a high-performing workforce in a high-performance workplace. The personnel deployed in such a demanding working environment must be medically and functionally fit for duty to reduce – if not prevent – sudden illness-type condition and occupational incidents. Enlightened employers are developing Health programs for a strong guaranty for the improvement and preservation of peoples’ wellbeing, welfare, and quality of life, on work sites and in their respective homes and families. These panelists will examine some of the health issues relevant to the Asia Pacific region.

• Dr. Francois Pelat, Director of Medical Services, Transocean
• Dr. Frano Mika, Overseas Health Manager, Saipem S.p.A.
• Dr. Olivier Lo, Group Medical Director, International SOS
• Dr. Norsayani Bt M Yaakobi, Principal Occupational Health Advisor, PETRONAS Group HSE Division
