Catalyzing improved performance for the drilling industry

IADC provides the space for stakeholders to come together, share knowledge, tackle common problems and develop solutions to the industry's critical challenges.

Collectively, IADC members work to improve operational safety, efficiency, reliability and environmental stewardship. We strive to establish a global regulatory regime that is transparent, appropriate and consistent.

Membership in IADC is for Drilling Contractors, Producers, Well Servicing Companies and Associated Service Companies who wish to contribute to the improvement of the industry by collaborating with others in the Association.

Collaborate to Shape the Industry Committees

IADC committees provide an open forum to share information and develop industry standards. Via these committees, members work to advance training, competence, HSE, best practices, and legislative and regulatory requirements for the industry.

Network and Share Best Practices Conferences

Longstanding IADC conferences and events unite drilling contractors, producers, regulators, and service companies, while new programs are continuously developed to meet evolving industry needs. From one region of the world to another, our conferences and events provide a forum to network with peers, share best practices, and increase knowledge and understanding of key industry topics.

Make Local Connections Chapters

IADC chapters provide local connections while also linking members to the global drilling network. Chapters are a

tool for knowledge building, leadership opportunities and networking. Participation offers invaluable opportunities to integrate and connect with local colleagues and resources.

Securing Enabling Regulation Advocacy

IADC is the voice of the drilling industry. We facilitate impactful advocacy across the growing number of countries where drilling operations take place. IADC shapes policy and legislation that is both fair and sensible, and works with regulators to advocate for better regulatory practices.

Ensuring a Competent Workforce Accreditation & Credentialing

IADC is directly addressing the industry's demand for enhanced workforce competency with a variety of accreditation programs and competency tools.

These industry-developed programs ensure that training initiatives and courses adhere to well-established and widely recognized industry standards. IADC believes that every person who steps onto a rig should be properly trained and credentialed.

Communicating Critical Information Industry News

For decades, IADC has kept the industry informed of the latest news and information. Our Drilling Contractor magazine and other periodicals, both print and online, provide the most comprehensive and up-to-date information on new technologies, best practices, regulations, and industry news.

Providing Practical Tools To Enhance Expertise Technical Resources

IADC brings the collective knowledge and experience of the global drilling industry into the hands of each member through a vast set of tried-and-true, industry-accepted resources. Many of our tools are designed specifically to help drillers perform their daily jobs safely and efficiently. From field handbooks and technical manuals to regulatory reports, safety alerts and model contracts, IADC is the definitive source.

Drilling Better Together

IADC provides opportunities for members to impact the future of the drilling industry.

We provide the space for members to connect, collaborate and create the solutions needed to achieve a mission we all share—improved performance in the drilling industry.

IADC members believe in

- Promoting safe drilling practices
- Protecting the environment
- Emphasizing top-quality operating performance
- Providing personnel training
- Encouraging political awareness and actions
- Promoting the highest standard of business integrity

Meeting our goals and serving the industry as a whole is made possible by the active support and participation of our members.
