IADC Future Technology Subcommittee

09.00 CST, 1 December 2016

Crown 1

Minutes

ART Vice Chairman Robin Macmillan opened the meeting and welcomed the attendees. Mike Killalea provided a safety briefing and reviewed the IADC antitrust policy.

The group first discussed their impressions of the two 2016 FT Spark Tanks. Suggestions included:

- Provide a deadline for abstracts
- Include a moderator. The moderator can set the order in which the panelists asks questions
- Invite questions from the audience, if time allows. Sharks are to exhaust their questions first, however
- Reach out to organizations that might otherwise be unaware of the events but would have interesting subject matter to present

The group decided to organize three Spark Tanks for 2017. Dates are 5 April, 2 August and 6 December.

The group discussed future projects. Big data and data ownership were considered a promising area for FT. It was suggested to ask Michael Behounek, Apache and the Operators Group for Data Quality, be invited to discuss with the subcommittee how it can be proactive in defining guidelines for data ownership. Other areas of possible endeavor suggested quicker land moves and predictive maintenance.

There being no further business, Mr Macmillan adjourned the meeting.

Attendance:

Name		Company Name
Rolf	Gullaksen	CAMERON
Maxine	Aitkenhead	DATA GUMBO
Andrew	Bruce	DATA GUMBO
Keith	Casswell	DIAMOND OFFSHORE DRILLING
Mike	Killalea	IADC
