WellCAP Course Codes Listing
Form WCT-11

The following WellCAP course codes should be used to complete the IADC WellCAP Application for Accreditation and the IADC-supplied electronic spreadsheet/log for reporting WellCAP training records. Each code distinguishes the course name, level of instruction, and the BOP stack qualification addressed in the course.

When completing the records log, the code is to be placed in the column labeled "Course Code" and must be entered for each Certificate of Completion issued. **Enter the course code EXACTLY as listed below. Do not insert "/", dash or any other punctuation.** As a reminder, Certificates of Completion data are to be reported to IADC no later than 90 days after the course completion date.

INTRODUCTORY COURSES

Course Code	Course Description
WSIS	Well Servicing Introduction Surface Stack

SUPERVISORY COURSES

Course Code	Course Description
UBDS	Underbalanced Drilling Supervisor
