About the IADC Advanced Rig Technology Conference & Exhibition
Onshore and offshore rig technology are the highly focused topics of the IADC Advanced Rig Technology (ART) Conference & Exhibition, organized by the IADC Advanced Rig Technology Committee. The IADC ART Conference & Exhibition serves as a leading forum to explore the state-of-the-art advances in rig technology, downhole operations, and integrating the two seamlessly with minimal human intervention. The event will also review activities of the IADC ART Committee, which has steadily advanced drilling technology, by exploring future technology, drilling control systems and automation. The current initiatives of the committee include developing operational guidelines, educating the industry on technology, assessing the pros and cons of advanced drilling technology, and identifying key deliverables for the industry.
